

Italian Republic

Rating report

Rating rationale

Core euro area member: Italy benefits from supportive fiscal and monetary policy frameworks under the EU and euro area institutional architecture. The economy's systemic relevance further underpins the high likelihood of support from European institutions under stressed scenarios.

Large, wealthy and diversified economy: Italy's EUR 2trn economy is the third largest in the EU and benefits from a wide diversification across sectors, supporting its economic resilience to shocks. Italy is set to receive EUR 194.4bn of Next Generation EU recovery funds (9.6% of average GDP over 2021-26F), which together with associated reforms should support its economic outlook.

Strong external position: Italy's record of current account surpluses has turned the country into a net creditor. This position, together with the euro's status as a global reserve currency, shields the country from external risks.

Low private indebtedness: Moderate private debt levels among Italian non-financial corporates and households support the stability of the financial system and reduce the risk of private sector liabilities materialising on the government's balance sheet.

Rating challenges: i) high government debt and funding needs, which are expected to remain elevated over the long term; ii) weak longer-run economic growth and labour-market rigidities; and iv) an ageing and declining working-age population.

Figure 1: Italy's sovereign rating drivers

Risk pillars	Quantitative		Reserve currency *	Political risk**	Qualitative***	Final rating
	Weight	Indicative rating	Notches	Notches	Notches	
Domestic economic risk	35%	aa+	EUR	Italy	- 1/3	BBB+
Public finance risk	20%	b			- 2/3	
External economic risk	10%	bbb			0	
Financial stability risk	10%	aaa			0	
ESG risk	Environmental factors	5%	[+1]	[-0]	0	
	Social factors	7.5%			- 1/3	
	Governance factors	12.5%	a-			
Sovereign Quantitative Model			a		-2	
Additional considerations					0	

*The reserve-currency quantitative adjustment applies to currencies in the IMF's Special Drawing Rights (SDR) basket.

**The political-risk quantitative adjustment is based on the World Bank's Political Stability & Absence of Violence/Terrorism index.

***The qualitative scorecard analyst adjustments, capped at one notch per rating pillar, are weighted equally with an aggregate adjustment rounded to the nearest integer. For details, please see Scope's [Sovereign Rating Methodology](#). Source: Scope Ratings.

Domestic economic risk

Overview of Scope's assessments of Italy's Domestic Economic Risk

SQM* indicative rating	Analytical component	Assessment	Notch adjustment	Rationale
aa+	Growth potential and outlook	Weak	-1/3	Weak growth potential
	Monetary policy framework	Neutral	0	ECB is a credible and effective central bank, limited adaptability of monetary policy to individual member states
	Macroeconomic stability and sustainability	Neutral	0	Large and diversified economy, stagnant productivity and weak labour market outcome

Figure 3: Nominal GDP and GDP per capita

Public Finance Risk

Overview of Scope's assessments of Italy's Public Finance Risk

SQM indicative rating	Analytical component	Assessment	Notch adjustment	Rationale
b	Fiscal policy framework	Weak	-1/3	Expectation of gradual return to primary surplus; very limited fiscal space; application of revised EU fiscal framework
	Long-term debt trajectory	Weak	-1/3	High debt stock vulnerable to permanent increases during shocks; high off-balance sheet debt; rising ageing-related and interest expenditure
	Debt profile and market access	Neutral	0	Strong domestic investor base; large central-bank holdings of public debt; resilient debt structure, but significant financing requirements

External economic risk

Overview of Scope's assessments of Italy's External Economic Risk

SQM indicative rating	Analytical component	Assessment	Notch adjustment	Rationale
bbb	Current account resilience	Neutral	0	Diversified and competitive export base; record of current account surpluses
	External debt structure	Neutral	0	Low external debt stock; composition by sector and maturity similar to peers
	Resilience to short-term external shocks	Neutral	0	Euro-area membership protects against short-term external shocks

Financial stability risk

Overview of Scope's assessments of Italy's Financial Stability Risk

SQM indicative rating	Analytical component	Assessment	Notch adjustment	Rationale
aaa	Banking sector performance	Neutral	0	Solid capital buffers, high liquidity and improved profitability; sovereign-bank nexus remains a core risk
	Financial sector oversight and governance	Neutral	0	Effective oversight under European Banking Union and the Bank of Italy, as well as the national markets authority, insurance supervisor and the pension funds supervisor
	Financial imbalances	Neutral	0	Low private-sector indebtedness; declining credit growth; real estate price dynamics in line with economic conditions

Figure 9: Non-performing loans, % of total loans

Environmental, Social and Governance (ESG) risk

Overview of Scope's assessments of Italy's ESG Risk

SQM indicative rating	Analytical component	Assessment	Notch adjustment	Rationale
bb+	Environmental factors	Neutral	0	Exposure to natural disaster risk; ambitious green transition investment programme
	Social factors	Weak	-1/3	Adverse demographics, moderate educational outcomes, risk of social exclusion
	Governance factors	Weak	-1/3	Fragmented political environment leading to frequent episodes of political instability; government has clear parliamentary majority

Appendix IV. Statistical table for selected SQM indicators

This table presents a selection of the indicators (24 out of 30 – with the governance indicator reflecting a composite of five indicators) used in Scope's quantitative model, in line with Scope's Sovereign Rating Methodology. The metrics and sources for the data presented here ensure comparability across global country peers and may therefore differ from data from national and other select international statistical series.

Pillar	Core variable	Source	2018	2019	2020	2021	2022	2023
